Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3753

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 4, 8 and 9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 4 and 8 encompass an embodiment of invention for which there is no disclosure. For example, in independent claims 1 and 7, there is specifically recited a "wire connector" which, as disclosed, is the terminus of the valve side of the electrical connection. Additionally, each claim recites a "first plug" which, as disclosed, is the terminus of the controller/power side of the electrical connector. Thus, claims 1 and 7 encompass an embodiment which includes both the valve side and the controller/power side of the electrical connector. That is, when the "first plug (is) selectively" secured. Claims 4 and 8 then add to this embodiment a "second plug". Based on the description at pages 9+ of the application, it is disclosed that the "plugs" at the controller/power side of the electrical connector are alternatives, not additives. That is, the description states that the particular controller/power side of the electrical connector is "selected" based on the ultimate use of the overall device. There is no disclosure of an embodiment in which two, or more, terminals 94a, 94b and 94c are used together as encompassed by claims 4 and 8.

Claim 9 is included due to dependency.

Claims 1-3, 5-7, and 10-16 are allowed.

Claims 4, 8 and 9 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Rivell whose telephone number is (571) 272-4918. The examiner can normally be reached on Mon.-Thur. from 6:30am-5:00pm.
